Track-Truck-EV

100% Electric Version

- Sustainable CPT (Cone Penetration Testing) solution
- Low noise level
- Zero emissions
- Electric power for more than one full working day

FUTURE**

100% electric Track-Truck

A.P. van den Berg introduces a new standard in emission-free Cone Penetration Testing (CPT) with the electric Track-Truck. The 100% electric Track-Truck operates quietly and without emissions, both while driving on its tracks and during CPT operations. This provides maximum flexibility at locations where noise reduction and emission-free operation are essential. Thanks to these characteristics, the electric Track-Truck is ideally suited for use in urban environments, nature reserves, and projects with strict environmental requirements. It is a future-proof solution that seamlessly combines performance and sustainability.

Technical specifications

Specification	Track-Truck-EV
Motor power	260 kW - 370 kW
Torque	1970 Nm - 3445 Nm
Battery pack	410 kWh
Drive system	Direct drive (one pedal drive, regenerative braking)
Range	1 day of CPT operations + driving distance > 170 km
AC charger	Up to 44 kW
DC charger	Up to 150 kW
DC charging time 10 - 80 %	Approx. 2 uren
